

Moolet Module Who's Online

Contributed by Brian Williford
Wednesday, 01 August 2007

Moolets Who's Online is a recent visitors, live visitors Module built with MooTools+Ajax for the Joomla 1.1.x Series CMS. This dynamic module allows for updating of members avatars without page reloading. This occurs via persistent state technology. User photos and or usernames / full names appear as login sessions come an go. Super slick energizer for any member driven site.

This is a Web Developer's dream component.

To see this in action or download visite Moolets.com. Parameter Controls:
