

Moolet Module Who's Online Lite

Contributed by Brian Williford

Moo's Online Lite is a recent visitors, live visitors widget built with MooTools+Ajax for dynamic updating without page reloading. This currently being offered as a Joomla Module. We can customize this to work on many different systems upon request. The lite version does not have the Moolet Total Users Module built in like the full version. This would be desired if you do not want to reveal how many members a site may have.

This Moolet displays the avatars of members who are currently logged in. The most active user will be displayed to the left if placed horizontally, or up top if in vertical mode. The least active members get bumped down the line and so on. The user image is linked to their profile if enabled.

See the Moolets Who's Online Lite in action here .

Administration Paramters Are:

Include Mootools JS File
 Mootools Dom Event or Onload Event
 Enable / Disable Mootools Effects
 Slide in Vertical or Horizontal
